

TECHNICIAN POSITION

Agrotecnio is committed to a diverse and inclusive work environment. Employment is assessed on the basis of qualifications, competence, integrity and organizational needs, in accordance with the HRS4R certification requirements. Women are strongly encouraged to apply.

Clear and precise description of the activity

The selected candidate will be dedicated to laboratory tasks in the context of the AGAUR funded project, Sòl-Saver. Briefly, the project aims to understand changes in soil health with regenerative practices on farms across Catalonia. This position, requiring a candidate with significant experience in laboratory tasks, is oriented to setting up and executing specialized analyses of soil nitrogen, among others.

Place description

Agrotecnio- Universitat de Lleida
Campus Agroalimentari, Forestal i Veterinari
Avinguda Alcalde Rovira Roure, 191. 25198 Lleida

Profile, requirements and merits duly accredited.

Candidates must possess a doctoral degree in Soil Science or related fields (agronomy, environmental chemistry, among others). Professional or research experience in contexts of agricultural fertilization assays or applications are desired, as well as strong understanding or experience of organic fertilization products and practices. Candidates will be evaluated based on their overall scientific profile, relevant experience, technical skills, and suitability for the position.
