

Agrotecnio Center-Resolution of the call for a postdoctoral position

Following the call for a postdoctoral position published in November 2017, the evaluation committee reviewed the profiles of all applicants. After due consideration the committee selected:

PATRICIA SARAI GIRON

The decision to select the above candidate was based on the fact that she matched closely the requirements of the advertised position in terms of expertise in molecular genetics, physiology and/or entomology, with a demonstrated relevant publication record to join a productive interdisciplinary research team. The work will take place in the Applied Plant Biotechnology, Crop Protection and Crop Physiology laboratories-Agrotecnio Center. The starting date will be by mutual agreement with the successful candidate but no later than May 1st, 2018

Signed:

Ignacio Romagosa

Agrotecnio Director
