2 Organizational Information

2.1 Organizational profile

Agrotecnio is an international center of excellence that develops frontier research intended to have a major scientific and economic impact and to improve the wellbeing of societies and individuals. It belongs to the CERCA institutes network (Research Centres of Catalonia), and it is located at the ETSEA Campus of the University of Lleida (UdL). Its mission is to carry out top-level fundamental and strategic scientific research focused on well-defined translational objectives in three main areas: crop and environmental science, animal science and food science, and to disseminate the outputs of this research to the society and the private industrial sector.

4. IMPLEMENTATION SINCE LAST INTERIM REVIEW

Agrotecnio has worked on the second implementation process of the HRS4R (Human Resources Strategy for Researchers) building upon the progress made during the initial HRS4R process and addressing any remaining gaps or areas for improvement.

We kept the idea of working with the working group and reviewing all the documentation prepared before and preparing new documents that we will follow in a near future. The Center has already changed a lot since the last interim assessment with changes on the appointment of a new director that reevaluate the organization's commitment to supporting researchers through the implementation of the HRS4R policy. By embracing new perspectives, engaging stakeholders, and aligning policies with strategic objectives. Also with the beginning of receiving core funding that determines the financial resources that will be available for Agrotecnio to support various initiatives, including those related to human resources management and support for researchers. Adequate funding is essential for implementing the new actions and measures outlined in our action plan, such as training programs, career development initiatives, and infrastructure improvements.

We have created a strategic plan that will serve as a roadmap for our organization, outlining objectives, goals, and actions to achieve our mission and vision. Integrating the HRS4R (Human Resources Strategy for Researchers) into a strategic plan has enhanced the organization's commitment to supporting researchers and creating an attractive research environment. Overall, integrating the HRS4R strategy in Agrotecnio's strategic plan strength the institution's commitment to promote a supportive and conducive research environment for our researchers. It ensures that human resources policies and practices are aligned with our center goals and objectives, fostering a culture of excellence, innovation, and inclusivity in research.

Our idea of helping the PhD's an early career forum has been accomplished creating an Early Career Forum where they can learn about their future research career. It is worth ,mentioning that the participation in these seminars is quite high, not only from our own staff, but from other research centers. Every meeting ensa with a taste of local food products

as a direct way to enhance socialization of new young staff from the different groups and departments.

Agrotecnio has also incorporated the R1 and R2 positions in the Scientific Strategic Committee.

We will maintain our OTMR recruitment policy promoting integrity, fairness, and professionalism in the hiring process, contributing to the organization's credibility, reputation, and ability to attract and retain top talent.
