## Junior Research Leaders Positions

### Final Resolution

*Agrotecnio is committed to a diverse and inclusive workplace. Employment is decided on the basis of qualifications, competence, integrity and organizational need, in accordance with the HRS4R certification requirements (available here). Female candidates are strongly encouraged to apply.*

On April 17, 2024, Agrotecnio launched an open call to recruit junior research leaders, aligning with the Strategic Plan 2024-2029. The plan includes an operational objective to hire highly qualified personnel to strengthen the research center's research lines.

Applications submitted by candidates were reviewed by an expert panel in line with Agrotecnio's Open, Transparent and Merit-Base Recruitment policies, resulting in a shortlist of 10 finalists. All applicants were notified and provided with feedback regarding the outcome of this stage.

The shortlisted candidates were subsequently invited for individual interviews with the selection panel at Agrotecnio's headquarters from September 26 to 30, 2024.

Following these interviews, the selection panel ranked the top candidates, who were then asked to confirm their acceptance of the offered position.

#### **Final outcome:**

The selected candidates who confirmed their acceptance of the position are:

- Aida Bargués
- Evan Marks
- Martina Sánchez-Pinillos

The selection panel expressed appreciation for all candidate submissions and has retained the CVs for consideration in future openings.

Jose Antonio Bonet  
Director  
Secretary of the Selection Committee
