

Technician Position

Agrotecnio is committed to a diverse and inclusive work environment. Employment is assessed on the basis of qualifications, competence, integrity and organizational needs, in accordance with the HRS4R certification requirements. Women are strongly encouraged to apply.

Following the open call for technician in line with research activities of the center Agrotecnio published on the 4th May 2025, the responsible researcher decided on 28th May, 2025 in Lleida and evaluated the profiles of the applicants. After due consideration, "The candidate selected adequately meets the requirements and merits of the call and, at the same time, has greater experience in research tasks". Finally the committee selected:

- Ruth Domenech

For the described work "The candidate will participate in Agrotecnio's project "Prefire", which seeks to characterize prescribed fire patterns, burn prescriptions, and pre-fire forest structure drive ecological outcomes, and to identify optimal burning windows and fire behaviour parameters for achieving desired management goals. The incumbent will: 1) Characterize fire behaviour and meteorological windows during prescribed burns to define a safe low intensity operating zone for fire crews; 2) Derive a metric based on composite indices that fire practitioners can apply and 3) Develop a standardized, rapid-application pre/post-fire monitoring protocol replicable across different forest types and management contexts."

The contract will be from July 1st 2026 to December 31st, 2026.

Foot note: Appeals against the outcome of the evaluation and selection process may be directed to the center within one month from the outcome of the call.

Lleida, 29th May 2025

Jose Antonio Bonet
Director
