

TECHNICIAN POSITION

Agrotecnio is committed to a diverse and inclusive work environment. Employment is assessed on the basis of qualifications, competence, integrity and organizational needs, in accordance with the HRS4R certification requirements. Women are strongly encouraged to apply.

Clear and precise description of the activity

The technician will join the Animal Breeding Group and contribute to the generation, organisation, quality control, maintenance and analysis of biological and research datasets arising from the group's ongoing research projects, contracts and technical services.

The postholder will participate in the processing and analysis of molecular markers of productive interest, gene-expression analyses from transcriptomic experiments, and the quantification and analysis of fatty-acid profiles and other lipid-related molecules from biological samples. In particular, the selected candidate will provide technical and analytical support for DNA extraction from animal samples; determination of molecular markers using end-point PCR and real-time PCR protocols; preparation of laboratory solutions and reagents; routine laboratory maintenance; maintenance of sample and results traceability; and, occasionally, assistance with sample collection at farms or slaughterhouses.
