POSTDOCTORAL POSITION

Agrotecnio is committed to a diverse and inclusive work environment. Employment is assessed on the basis of qualifications, competence, integrity and organizational needs, in accordance with the HRS4R certification requirements. Women are strongly encouraged to apply.

Clear and precise description of the activity

The postdoc will be in charge of establishing and maintaining a greenhouse experiment consisting in growing potatoes in soil contaminated with bisphenol A (BPA) and characterizing the bacterial and fungal communities in the rhizosphere and in the tubers. In particular, the postdoc will have to organize the following tasks: collect the soil, sieve it, prepare the pots adding the BPA and the potatoes, water the plants and harvest the potatoes. At the harvesting time, soil and plant will be sampled, lyophilized, and the samples will be processed in the Lab. The postdoc will be in charge of the logistics necessary for the smooth development of the experimental activities.
